What's New

News changes with each passing hour. All kind of news—fascinating, strange, prophetic, real and unreal. It comes flashing on the pages of your paper from all parts of the world, and you want to know what's new.

Advertising is a form of news. It is governed by the same general principles and answers your every question as to "what's new?" You can depend upon advertising news. It is truthful. If you want something for the home, you will find it advertised. If a dress, a suit of clothes, a hat, a pair of shoes, a diamond ring, a bridge lamp, an electric refrigerator or a house and lot—you'll find it advertised.

Advertisements supply the surest means of knowing "what's new" in merchandise. Learn to read them—trust them—profit by them.

Read the advertisements as regularly as you do the news

CROSSFIELD PIONEER PASSES

Mr. Robert Whitfield, Prominent Citizen Died Monday After Long Illness

On Monday, September 16th, 1929, at the family residence Robert Whitfield, age 74 years, died after a prolonged illness.

By the passing of Mr. Robert Whitfield Crossfield will miss one of its best known and respected citizens. During the past seventeen years he has lived in our midst, he has gained the goodwill and regard of all whom he came in contact. An energetic business man, of the highest type of integrity and straightforwardness, being associated for many years with the rural press of Alberta, and printer and publisher of "The Crossfield Chronicle."

A native of Lancashire, England, Mr. Whitfield came out to western Canada in 1910. For a couple years he was on the Cochrane Advocate and in 1912 took over the Crossfield Chronicle. Prior to coming to Canada he had spent 23 years with the Wigan Lancashire Examiner and nine years with the Bolton Evening News. Mr. Whitfield took a keen and active interest in his paper until he was taken ill some time ago.

The deceased is survived by four sons: Robert, of Aliv; John William, Cochrane; Arthur, Leyland, England; and John Henry, Calgary; and three daughters.—Mrs. M. Turner, Calgary, and Mrs. C. E. Marston, Calgary; and Mrs. Geo. Austin, Manchester, England. Two sister also survive; Mrs. Gaskell, Manchester, and Mrs. S. Adderly, who, since the decease of his wife 4 years ago has kept house for Mr. Whitfield.

The funeral took place on Thursday, and was largely attended by sympathetic friends from town and country. Service conducted by Rev. Clay, of Olds, and Rev. J. Adams Cooper, of Crossfield, was held in the church of Ascension. After which interment was made in the Crossfield cemetery. The casket covered with flowers was borne by W. Pogue, S. Jones, C. Asmussen, I. Lewis, F. Stevens and L. McRory. The funeral arrangements were carried out by A. N. Shaver, Calgary.

Wreaths were received from the following: Mr. and Mrs. Hewitt, The Womens Guild, The Vestry of the Church of the Ascension, Mr. and Mrs. Jones, Mr. and Mrs. Fitzpatrick, Mr. and Mrs. D. H. McFadyen, Mr. and Mrs. Lewis, Mrs. S. Adderly, The Family, Mr. and Mrs. A. Cruickshank, George and Fong, Jim, Belts & Jim Jr., Mr. and Mrs. H. Carmichael, Mr. and Mrs. Mossop, Mr. and Mrs. H. Ballam Mr. and Mrs. Pullan, Mr. and Mrs. W. J. Steel, Calgary, The Massey-Harris Co., Calgary.

Olds School of Agriculture, Developing Mechanics Branch of Its Course

The School of Agriculture at Olds will open for the sixteenth session on October 20th next. The number of applications and enquiries that are being received indicate that there will be a good average attendance again this year. The average attendance for the past three years has been 251, and it is expected that the attendance this year will be very close to that figure.

The courses that are offered are very similar to those that have been taught in the past. The mechanics branch, however, is being strengthened. The school is taking on a special instructor in gas engines and farm machinery. The services of this man will be for the purpose of strengthening the mechanics branch of the agricultural course. With the services of an additional instructor who is especially well qualified for giving instruction in electricity, gas engines and farm machinery, it will enable the school to put on a course that would rank among the highest in the province in these subjects.

The dormitories are capable of accommodating approximately 175 for board and room. Those who apply early and book their reservations for rooms get the preference at the time of registration; however, those who are not able to get into the dormitories, have their accommodation arranged for by the school management, with good homes in the town of Olds. The cost of board and room in the school and in private homes is \$1.00 per day per student.

C.G.I.T. NEWS

The C. G. I. T. Club held their re-organizing meeting on Monday, Sept. 16. The following are the officers elected for the coming year: President... Mable Young; Vice-Pres... Marjorie Young; Treasurer... Frances Mobbs; Secretary... Marjorie Metheral; Song Leader... Ida Calhoun. With these able officers in charge the club is in a position to break all previous records.

The Progress of Little Things

In these modern days when it is “the thing” to boast about the bigness of this and that, and when countries and cities lay claim to the possession of the biggest of something or other, we are apt to forget how many of these “big” things were brought about, and to lose sight of the essential fact that anything “big” is in reality only a collection or combination of many very small things.

Nowadays not so much stress is laid upon old sayings of a couple of generations ago, such, for example, as “Mighty oaks from little acorns grow” nor do we stop to contemplate that this globe on which we live is after all made up of “little drops of water, little grains of sand.”

It would be better for everyone of us if we gave greater heed and attached their real importance to the little things of everyday life. The wealth of the multimillionaire is, after all, only an unusually large accumulation of pennies, and some of the very rich men of the world laid the foundation of their wealth by careful saving of their pennies. The hundreds of millions of bushels of Marquis wheat harvested in Canada every year is the result of one little kernel developed by Dr. Saunders.

The investment of a very few dollars by the parents of a baby at the time of its birth, if left to accumulate at compound interest throughout the years of its minority, would mean a very substantial sum of money upon which to commence a career in the world by the time the child came of age.

These thoughts come to us when reading a recent article about Trinity Church, in New York City. This church, which stands at the head of Wall Street, the centre of New York's financial district, began its career 233 years ago on a precarious income derived from the tithe and dead weights cast up by the sea along the shore where one of the world's largest cities now stands. Today Trinity Church Corporation is one of the largest holders of real estate in that city, owning \$15,000,000 of revenue producing real estate, bringing into the church coffers almost \$1,500,000 a year. Nor do these large figures include the value of the property upon which Trinity Church itself stands, the equivalent of about two square blocks in the heart of the financial district, and conservatively valued at another \$15,000,000.

The tremendous wealth of Trinity, we read in the Wall Street Journal, would appear fantastic to the organizers of this church in 1696, when King William III. made the original grant of land to the parish, supplementing nine years later by a further grant from Queen Anne. In those days the land was of no particular value, Wall Street was non-existent, and Fifth Avenue not even a foot path. But Manhattan Island was destined for great wealth, and the worthless property of a little over 200 years ago is worth many millions today.

Historical records contain efforts to obtain funds to start the church, which appear incredible when contrasted with present day values. One aid to the building of the original church in 1696 was a patent issued by the Governor of New York. It permitted vestrymen to seize all drift whales, or anything else driven by the sea onto land, and for which there was no owner. It further directed that the whales be towed ashore, fried, and proceeds used for a building fund.

The lesson of the foregoing bit of history is this: Today there are thousands of young people just starting out in life. They have little or nothing. With them it is indeed a day of small things, and as they look around them and see so many huge undertakings, great enterprises, and the speed of the modern world, they are inclined to be discouraged, and become obsessed with the false idea that there is no opportunity for them.

But opportunities exist today as never before. There are a thousand today where there was but one two hundred years ago. The beginning must be small now, as it was then, but the opportunity is there just the same, while the possibilities and probabilities of growth are many times more rapid now.

Tackle the small thing at once; save the small things, the pennies; watch for and embrace your opportunities; conserve those things which come to you. The bigger things, and the rewards of work and of service to your fellowmen will follow in due course.

Supreme In Circus World

John Ringling Purchases Five Of His Foremost Competitors

John Ringling, who started as a singing clown, rules as supreme ring master of the circus world today. By purchase of five of his foremost competitors, involving several million dollars, the last of the Ringling Brothers has acquired control of the largest group of tent shows in the world, including their talent, menageries, equipment and winter quarters.

The shows which have been added to the Ringling group are: Sella-Plato, Hagenback Wallace Animal Show, Sparks, John Robinson's and the Al G. Barnes Wild Animal show.

“Excuse me,” said the impatient man at the table to the manager, “but did the waiter who took my order leave any wife or family?”

You seldom find the name of the fellow who thinks he's “it” in Who's Who.

Boils

Dry up boils with Minard's. It's antiseptic qualities kill the poison and draw out inflammation.

Alberta Calves For Dakota

Alberta's Flying Rancher Receives Order From North Dakota State University

George Ross, southern Alberta's flying rancher, has received an order from North Dakota state university for 1,000 calves to be distributed by the university to boys' and girls' baby beef clubs throughout the state as part of a movement to encourage more and better livestock production.

The calves will be delivered during October, and after distribution will be fed up during the winter for spring stock shows in North Dakota.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which progresses to inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodic ally subject to quins have thus made themselves immune to attack.

Gratifying Progress In Tree Planting

The 1928 reports of inspectors of the tree plantations made on prairie farms with trees furnished by the Forest Service of the Department of the Interior from their nurseries at Indian Head and Sutherland, Saskatchewan, show that 83 per cent. of the plantations inspected were found to be in very good condition, 14 per cent. were fair, and only 3 per cent. were in poor condition.

There are five types of United States currency: silver certificates, gold certificates, federal reserve notes, national bank notes, and U.S. notes.

Story Of Privation

Tragic Case Of Two Boys Lost In Woods Of Northern Quebec

How 12-year-old Michael Courtols remained for nearly two months beside the body of his brother, Rene, 19, dead from hunger and privation in the woods, and how the two of them had wandered for miles, famished and helpless, was described at Roberval, Quebec, at the inquest into the death of Rene Courtols, found dead in the woods of northern Quebec, after having been missing since August, 1928.

Roots, berries and fish bones furnished slender means of livelihood for a time, young Michael told the coroner's jury. They were four hundred and fifty miles from Roberval, the nearest outpost of civilization. Having but two matches, they kept a fire burning in a pall for two months. When the search party found them, the fire was still smouldering but Rene Courtols was dead. Michael had almost completely lost his reason when rescued, but he is now completely restored, though he is a physical wreck.

The boys were lost when their father left them at his cabin while he undertook a hunting trip. They wandered from the camp.

The coroner's jury returned a verdict of “death by starvation and misery.”

FEELING WORN OUT

When the Blood Becomes Watery a Breakdown Follows

How many girls and women suffer from headaches, pain in the back or side, poor appetite, nervousness and a constant feeling of weariness and palpitation of the heart at the least exertion. Of course, all these symptoms may be present in any one case, but any of them show that the blood has become thin and watery, and good health can only be regained by enriching the blood. This should be done without delay. For this purpose, the blood tonic most recommended, and so surely as Dr. Williams' Pink Pills. Every dose helps to enrich the blood, and the more you take, the more you will feel the difference. This brings new health and vitality to weak, and often dependent people. The truth of these statements is proved by the case of Mrs. Howard King, R.R. 5, Truro, N.S., who says: “A couple of years ago I grew so weak I could scarcely walk across a room without help. My blood was thin and I was almost breathless. I had taken Dr. Williams' Pink Pills on a former occasion with good results, and so decided to try them again. By the time I had taken a few boxes I felt much better, but I continued taking the pills for several months, by which time I could walk for miles with little effort. I do all my own housework and care for four children, so you will see what Dr. Williams' Pink Pills have done for me.”

You can get these pills through any medicine dealer or by mail, post paid, at 50c a box from Dr. Williams' Medicine Co., Brockville, Ont.

Surprised At Development

Lord Queensborough Impressed With Mining Possibilities Here

Completing a tour of Canada, Lord Queensborough, chairman of the Dominion advisory board of Canadian Securities, Limited, arrived in Toronto that he was much impressed with the mineral developments going forward in the Dominion. “I had no idea,” he said, “of the immense mineral wealth of Canada until I went through northern Ontario, Manitoba and British Columbia.”

Lord Queensborough declared his report on investment opportunities in the Dominion undoubtedly would be favorable.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in the pain comes out and there are ample grounds for saying that it is an excellent article.

Firebrick and Fireclay Products

Firebrick and fireclay shapes are produced, both from domestic and imported clays, in Nova Scotia, Quebec, Ontario, Saskatchewan, Alberta, and British Columbia. Refractory silica bricks are also produced in Nova Scotia and Ontario.

Minard's Liniment—Used for 50 years

There is a Manchester sexton who believes in accuracy, as witness the entry: “Died—, male; aged three months; unmarried.” Which leaves no possible room for doubt.

Relief Of Unemployment

Manitoba To Provide Public Works For The Winter Months

\$725,000 construction program to be carried out in Manitoba during the coming winter was announced by Premier John Bracken, as a means of relieving the unemployment situation. At the same time, action was taken to have the Dominion Government and cities and towns in the province follow a similar course with respect to any undertakings they might have in view.

The work to be done will include construction of a new unit at the Selkirk Mental Hospital, at a cost of \$225,000; building of the first section of the Trans-Canada highway east from Whittemouth towards the Ontario boundary at a cost of \$200,000; and completion of the new provincial jail near Headingly, at a cost of \$300,000. Appropriations for the works were passed by the legislature at its last session.

Highway To The North

Stefansson Favors Road From The Pas To Northern Plains

Returning from a trip to Churchill, Dr. V. Stefansson, famous explorer, declared he stood ready to give all the aid he could in the attempt to have a highway connecting The Pas and northern points with the roads of the continent. Enlisting himself as an advocate of a highway to the north, the famous explorer declared that it would be “another step in the opening of the north, a logical advance of civilization into the new northern empire and another blow to the old prejudice that the north is disagreeable and worthless.” He declared that a road into the northern country would “add ten-fold to Western Canada's attractions as a tourist haven.”

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites, to the stomach, the intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Commissioner Of Lands

J. W. Martin Is Appointed To Position In Federal Department

J. W. Martin has been appointed commissioner of Dominion Lands, in the Department of the Interior, succeeding the late J. W. Greenway. Mr. Martin has been acting commissioner since Mr. Greenway died about a year ago.

Mr. Martin, who was born in Goderich in 1879, has been in the department many years. He was secretary to the commissioners who negotiated treaty No. 8 with the Indians of the Peace River district. In 1903 he was Dominion lands agent at Lethbridge; in 1907, assistant inspector of Dominion lands at Medicine Hat; 1910, inspector of land agencies, Calgary; 1927, acting superintendent at Edmonton. He came to Ottawa as assistant to Mr. Greenway in 1928.

Wife (to returning hubby)—And you dare look me in the face?

He—S'yes, dear! (lie), you shoo one gets used to most (hic) anything.

Halley's comet has a record dating back to 240 B.C., and its visitations spread alarm and consternation throughout Europe during the Middle Ages.

Japan produces more feature motion pictures than any other country according to the U.S. Department of Commerce.

Mrs. Speaks—And must our country stand with her arms folded and her hands in her pockets?

Kill that corn with Minard's Liniment.

Ontario Research Foundation

Saskatoon Professor Will Go To Toronto To Engage In Research Work

Dr. Seymour Hadwen, research professor of animal diseases at the University of Saskatchewan, will leave Saskatoon for Toronto shortly for the Ontario Research Foundation as director of veterinary science.

This foundation is subscribed to jointly by a number of commercial firms in Ontario, and the Ontario Government. The chairman is Sir Joseph Flavelle.

Dr. Hadwen, who has been in charge of the veterinary research at Saskatoon since the laboratory for this purpose was opened, comes from Manchester, England. His research work on the effect of sunlight on white animals and the susceptibility of white cattle to attacks by parasites have attracted attention among scientific men and stock breeders. He has also made interesting discoveries with regard to the cause and method of the change of colour of the fur of wild animals in winter.

Amputation Association

Annual Convention Attended By 300 Delegates Is Held In Montreal

From all parts of Canada, 300 delegates to the eighth annual convention of the Amputations Association of the Great War, gathered at the Mount Royal Hotel, in Montreal, recently. Sir Arthur Currie received the members individually.

The Dominion officers are: A. E. Lambert, Ont., president; A. Palmer, British Columbia, first vice-president; H. Gendron, Quebec, second vice-president; and A. Sutcliffe, Ont., secretary-treasurer. Executive: W. D. Davies, Alberta; E. A. Baker, Ontario; A. Blain, Saskatchewan; J. Brown, Ontario; T. B. Chettle, Manitoba; R. Myers, Ontario.

A. L. Schlesinger, representing the disabled U.S. veterans of the World War, spoke of the common bond of suffering which united disabled men on both sides of the boundary line.

Prospecting Activity In West

Over 20,000 Mineral Claims Recorded In Manitoba and Northern Saskatchewan

Some idea of the amount of prospecting being done in Manitoba and northern Saskatchewan may be obtained from the number of claims staked and recorded during the past year. In 1928 there were 7,335 mineral claims recorded in The Pas mining district, 1,400 in the Cold Lake district, and 2,118 in the Winnipeg district. There are at present over 20,000 mineral claims recorded in Manitoba and northern Saskatchewan.

Minard's Liniment—The King of Pain.

Sunday Work In Russia

Sunday was abolished as a regular day of rest when the Soviet Government recently inaugurated in scores of trades and institutions a new “continuous production week.” Employees will have their regular hours and rest-day, but work will be carried on continuously by others.

Your Kids Need Sugar

It supplies body fuel for the energy that keeps them going and growing. No need to stuff or set fat and lazy.

Use WRIGLEY'S for sugar and flavor, and see how ruddily the boys and girls respond.

It's the new science of health-building. Try WRIGLEY'S yourself and stay thin.

Population Of Australia

Commonwealth Statisticians Show Increase During the Past Year

The population of Australia at December 31 last, was 6,336,786, an increase during the year of 1928, of 101,932, according to figures compiled by the Commonwealth statisticians. The corresponding estimate for New Zealand was 1,486,952, showing an increase of 18,862.

The state of New South Wales has a population of 2,455,280; Victoria state 1,760,689; Queensland, 916,689; South Australia 579,348; Western Australia, 405,573; Tasmania, 218,563.

The population of the six capital cities of Australia now totals 3,018,248.

Asthma In Torture.—No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know how, from experience, how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Millions Spent On Hotel Buildings

To provide additional accommodation for visitors to Canada, new hotels just completed, or in course of erection in different cities of Canada represent a total cost of over \$32,000,000.

Blood passes through the heart at a rate of about seven miles an hour.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use “Centre Pull” Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Appleford Paper Products Limited

Western Representatives:

HUNTER-MARTIN & CO., REGINA, SASK.

ISLAND COLONY FOR DOUKHOBORS IS NOW PROPOSED

Victoria, B.C.—Fanciful Doukhobors from all Western Canada, including those who have been making trouble in interior British Columbia, will be placed in a prison colony, probably on Darcy Island, in the Gulf of Georgia, between the mainland of British Columbia and Vancouver Island, if the Federal Government accepts plans laid before it by the Provincial Government.

The scheme, it was revealed, has been placed before Hon. J. H. King, Federal Minister of Health. He will discuss the matter with his colleagues on his return to Ottawa.

The proposal that Doukhobors who refuse to obey Canadian laws be removed to a colony by themselves, where they will have no contact with law-abiding members of their sect, is advanced by the Provincial Government in the belief that the whole Doukhobor problem is a Federal one. The Doukhobors, it is explained, were brought here under contract by the Federal Government.

As Doukhobor colonies exist in Alberta and Saskatchewan, as well as British Columbia, no single Provincial Government, it is pointed out, can adequately deal with them.

Darcy Island is suggested as a suitable place for the proposed colony, because it is isolated and escape from it is almost impossible.

The Provincial authorities feel that the fanatical members of the Russian sect should not be placed permanently in a penitentiary. Some less stringent form of imprisonment, it is thought, is desirable. On Darcy Island or some similar place they would be allowed comparative liberty, and would be able to engage in agriculture. After being there for a time it is hoped they would agree to embrace Canadian customs.

Find Lost Aviator

Rescued in Northern Manitoba After Wandering in Bush For 16 Days

The Pas, Man.—After wandering 16 days in the wilderness of northern Manitoba, during which time an intense search by air and land was made for him, C. F. Mews, young aviator, was discovered by V. Partridge, airman, some 30 miles west of Oxford House, just where searchers had virtually abandoned hope of finding him.

Mews is little the worse for his experience. He is somewhat thin and haggard, having lived principally on berries, which are plentiful in the north this season, and he expressed confidence that he could have made his way to Oxford House, had not Partridge picked him up. His clothes were in tatters as a result of scrambling through the thick brush.

The youthful flier, who is a pilot for the Northern Aerial Mineral Exploration Company, was lost on August 24, when forced to land near Kene Lake owing to lack of fuel. He remained with his machine for two days, hoping that his companions would be able to spot him from the air and come to his assistance.

When aid did not arrive, Mews decided to set out for Oxford House, 70 miles as the crow flies from the place where he landed. The bush, however, is very thick throughout the territory and the country is dotted with lakes, making travel by foot extremely hard. It is estimated that he walked over a hundred miles in attempting to reach his goal.

Meantime "planes" were sent out to hunt for him and Indian trackers took up his trail, being guided by occasional foot-prints and plucked berry bushes. When Mews was found the Indians were only 12 miles behind him, and probably would have found him in two days' time if he had not been seen from the air.

Heads Grain Exchange

Winnipeg.—William A. Murphy, vice-president of the Reliance Grain Company, Limited, was elected president of the Winnipeg Grain Exchange, succeeding James A. Crowe, who retired. Mr. Murphy was elected by acclamation. A. P. White, of the firm of Clark and Martin, and Ernest S. Parker, were elected vice-presidents.

Alberta Wheat Pool

Calgary, Alberta.—The Alberta Wheat Pool now owns 430 elevators spread over the length and breadth of the province. This is an increase of 135 over the number operated last year. The Pool now has facilities to handle approximately 90 per cent of all Pool wheat.

W. N. 12

Makes Important Discovery

Young Scientists Startles American Chemical Society With Demonstration

Minneapolis.—The splitting of a supposedly indivisible element, hydrogen gas, in two substances, was demonstrated to the American Chemical Society here.

It was called the "greatest scientific discovery of 1920," by Dr. Hugh S. Taylor, of Princeton University, chairman of the session.

Dr. R. F. Rothgerfer, a young German, who was a 17-year-old infantryman in the front-line trenches at the close of the world war, is the discoverer.

Dramatically he set his proof before the eyes of the chemists in a spot of light upon the wall of a University of Minnesota lecture room. Like a moving finger it wrote the forecast of a revolution in physical chemistry. This revolution was described enthusiastically by Dr. Taylor.

"It opens the way to finding an entirely new species of molecule. It is the first proof of something forecast mathematically by the new wave mechanics. It means that our texts on physical chemistry will have to be re-written."

The discovery has no present commercial use, but the new world in chemistry it seems to open is very important.

Forecast Dominion Election

Hon. Robt. Forke Says Elections May Be Held Within a Year

Winnipeg.—Within 15 months—and probably within a year—a Dominion election will be held, was the forecast of Hon. Robert Forke, Minister of Immigration, speaking before the Winnipeg Liberal Association here. The Dominion minister declared that the Liberal party would make gains in the Maritimes, Manitoba, he said, would be the keystone province.

"Why pay people to come to this country?" asked Mr. Forke. "Canada is a good enough country for people to come to of their own volition."

The matter of assisted passages required very serious consideration, the minister commenting that he intended to cut some of the assisted immigration afforded in the past.

No immigrant who paid his own passage has been deported, Mr. Forke pointed out, but all discontented immigrants sent back to Britain have come out under the assisted passage plan. "I still believe that there is room for everybody in Canada, but we want them to come here only when we can absorb them," he declared.

Jury Makes Recommendation

Unable To Establish Origin Of Fatal Winnipeg Fire

Winnipeg.—Stating that it was unable to definitely establish the origin of the fire that destroyed the Metropolitan Hotel, the jury returned a verdict on September 1, with the loss of nine lives and more or less serious injuries to 10 persons a coroner's jury which has investigated the disaster has expressed the opinion that the building was not adequately equipped with means of escape in case of fire.

The jury recommends that proper authorities forthwith have a thorough investigation made of all buildings of three stories or more used as residences by three experts, including the fire chief, to secure their unbiased opinions and make recommendations for more adequate protection when necessary of occupants in case of fire.

Yukon Parcel Post

Service To Be Suspended During the Winter Months

Calgary.—Parcel post to the Yukon will be suspended during the season of closed navigation on the Yukon River, which extends approximately from October 1 to May 21.

During this period mail addressed to the Yukon will not be accepted unless directed to Champagne, Carleton Place and White Horse.

Permission to convey such mail as is offered by the public for carriage via air service from Prince George, B.C., to the Ingonika River area in Northern British Columbia, has been granted by the Western Canada Airways of Winnipeg.

Special stickers will be sold by the company in payment of the special charge for air carriage.

Steamship Disaster

Helsingfors, Finland.—The number of persons missing in the Kuru steamship disaster is officially stated to be 120, while an unofficial estimate is 145. Only 45 bodies have been recovered.

Doukhobors Sent To Jail

Fifty-Nine Members Of Sons Of Freedom Are Sentenced

Regina, Sask.—Ninety-six Doukhobors, men, women and children, self-styled Sons of Freedom, have been sent to Prince Albert. Of this number, 59 have been sentenced to serve six months in jail, while the remainder, consisting of 37 juveniles, 20 boys and 17 girls, will be handed over to the children's welfare bureau at Prince Albert.

Thirty-four women who, disrobed two miles east of Mile 40 on the highway, pleaded guilty of charges of indecent exposure. Two women and 23 men were convicted on a vagrancy charge, while no charge was laid against the juveniles.

Soviets To Stay Out

Will Not Participate In Plans For An Economic United Europe

London, Eng.—An Exchange Telegraph despatch from Riga states that the Russian foreign commissariat had declared the Soviet Union did not intend to participate in plans formulated at Geneva for an "economic united states of Europe."

The despatch said the Soviet opposed schemes "tending to estrange Europe from America" and desired to remain neutral in the forthcoming economic struggle between the two continents.

STATE CONTROL SUGGESTED FOR BROADCASTING

Ottawa.—Radio-broadcasting in Canada should be controlled and operated by a government-owned company. That is the effect of the chief recommendation of the royal commission, which presented its report to Hon. P. J. Caudin, minister of marine and fisheries.

The company would have somewhat similar relations to the Dominion Government as the Canadian National Railways has, but would be distinct from that organization. It would have 12 members, three representing more particularly the Dominion Government, and one representing each of the provincial governments. The members of the commission were Sir John Aird, Toronto, chairman; Charles A. Bowman, Ottawa, and Dr. Augustin Frigon, Montreal.

The recommendations provide that the task of supplying the programs would fall upon the provincial representatives of the company.

The present owners of broadcasting stations would be recompensed when their plants were taken over or dismantled. The expenditure necessary for the operation and maintenance of the service should be met by license fees, rental of time on stations for programs employing indirect advertising and a subsidy from the Dominion Government.

High-power stations should be erected across Canada. As a nucleus to the publicly-owned service, seven 50,000-watt stations should be provided to give a good reception over the entire settled portions of the Dominion.

In making public the report, Mr. Caudin said he was well satisfied with the commissioners and their work.

The report will be submitted first to the technical officers of the department. Later it will go before the cabinet. To put the recommendations into effect would necessitate important legislation.

Represent 100 Years of Service

Harry Saunders (left), engineer of the special Canadian Pacific Railway train that recently took E. W. Beatty, president of the railway, and several directors on a tour of the Maritime Provinces, and Charles Henderson, conductor on the train, represent between them just over a hundred years' service with the company. Mr. Henderson has put in 53 years of service, making him the dean of C.P.R. engineers; Mr. Saunders has a record of 48 years' railway service.

IN AIRPLANE CRASH

Lady Mary Heath, noted English aviator, was seriously injured in an airplane crash at Cleveland. Her condition is reported as favorable.

Saskatchewan By-Elections

Dates Have Been Set For October 7 and 14

Regina, Sask.—Fixing of the dates of eight by-elections made necessary by the elevation of certain private members of the Saskatchewan Legislature to cabinet positions, calling of the first regular session of the legislature by the new government shortly after the first of next year, and decision to hold a provincial-wide Liberal convention next spring, are the three developments of the political situation in Saskatchewan.

Premier J. T. M. Anderson announcing during the day the dates of the by-elections, stated the regular session of the legislature would not likely be called until after the first of the year. George Spence, in charge of the organization department of the Saskatchewan Liberal Association, made the announcement of the intention to hold a provincial-wide convention in the late winter or early spring.

The dates of the by-elections are as follows: Regina, Moose Jaw, Saskatchewan and Lumsden, nominations on September 30, elections on October 7, Tisdale, Moosemin and Yorkton, nomination on October 7, elections on October 14.

Dress Reform Movement

Combination Trousers and Skirt Suggested For Universal Use

London, Eng.—The dress reform movement broke into the congress of the World League for sex reform on a scientific basis when a combination of trousers and skirt was suggested for universal use.

Dr. J. C. Lugel, of England, addressed the delegates of 11 countries, said that men possibly will adopt skirts and women trousers in the future, or more likely there will be a uniform combination for both sexes. He urged creation of a new mode of dress which would incorporate the advantages for both.

Macdonald May Sail On 28th

New York.—In a special cable from London to the New York Times, the London Daily Express is quoted as saying that Premier Ramsay MacDonald has definitely decided to sail for the United States on September 28.

Study Wheat Prices

Washington.—Investigation of the disparity between Canadian wheat prices and the prices of wheat in the Northwestern States, together with a study of the whole subject of grain storage facilities, has been initiated by the Federal Farm Board.

Send Message To His Majesty

Business Men Meeting in Edmonton Send a Message Of Greeting

Edmonton.—A message of greeting from the 300 business men from all provinces, and representatives of five of the leading chambers of commerce of Great Britain, together with members of the Mother of Parliaments, was sent to King George at the opening of the fourth annual convention of the Canadian Chamber of Commerce. The message, signed by the president, William Hinks, conveyed to His Majesty the rejoicing of the convention over the improvement in his health.

Messages of greeting from the Governor-General; Rt. Hon. Ramsay MacDonald, prime minister of Great Britain; Rt. Hon. W. L. Mackenzie King, prime minister of Canada; Lord Passfield, secretary of state for the dominions; Lord Ivesgh, president of the Federation of Chambers of Commerce of the British Empire; and from the premiers of various Canadian provinces, were read.

"It is the very earnest and confident hope of myself and of all my colleagues that the remarkable progress of Canada may continue at a rapid rate; and that the free, the happy and the mutually advantageous association which unites her with Great Britain may be strengthened," said the prime minister of Great Britain in his message.

International Balloon Race

Ten Entries For the Gordon Bennett Event To Be Held Soon

St. Louis, Mo.—Ten balloons, representing the United States, France, Germany, Belgium, Denmark and the Argentine, will soar away from St. Louis, September 28, in quest of the international Gordon Bennett trophy. It will be the eighth of the international balloon races and the third to start from St. Louis. Seven of the races have been won by the United States, and five by Belgium, which gained permanent possession of the original Gordon Bennett trophy with its third straight victory in 1924.

The United States became permanent possessor of the second trophy with victories in 1926, '27 and '28. Now the third of the Gordon Bennett trophies is up, with three U.S. air men seeking to gain the first leg on it.

LABOR PARTY WINS APPROVAL OF THE PEOPLE

London, Eng.—With Communist entanglements completely severed, the Labor party conference opening in Brighton, at the end of the month, is expected to devote the bulk of its attention to overdue reforms with the object of bringing the party constitution into line with modern necessities.

The executive's report proclaimed that the Labor Government has seized the people's imagination. Events are being shaped with a vigor and spirit that is refreshing, it says, after the inertia of the past four years.

Answering the Liberal demand for electoral reform, the report says that clamor never was heard when the Labor party was struggling for existence.

The affiliated membership of the party dropped from 3,294,000, in 1927, to 2,077,000 last year, largely due, the report says, to difficulties arising from the Trade Union Act which compelled civil service organizations to discontinue affiliation, while in many instances new machinery for securing the contracting of party supporters had not yet been established.

Premier's Western Trip

Depends Largely On the Plans of Ramsay MacDonald

Ottawa, Ont.—The western trip of Premier Mackenzie King this fall depends a good deal on the plans of Premier Ramsay MacDonald, of Great Britain. Premier King states that if Premier MacDonald visited Washington, he (Mr. MacDonald) would come to Ottawa at the conclusion of his visit, if the British prime minister came to Ottawa, Mr. King said he wanted to be here to receive him and discuss certain matters of interest to Canada and Great Britain. He expects that if Mr. MacDonald crosses the ocean it will be about the end of this month, or early in October. Mr. King will not go to Washington. He regards Mr. MacDonald's discussions there as entirely between the president and the premier of Great Britain.

ANGLO-AMERICAN NAVAL ACCORD EXPECTED SOON

London, Eng.—Official announcement that Premier Ramsay MacDonald would sail on September 28, for the United States, to visit President Hoover, was held here as definite evidence that the two governments had virtually reached an agreement upon naval disarmament.

Well-informed circles indicated that a question involving three cruisers of the eight-inch class is the only point upon which full accord has not been reached.

The developments came swiftly after a conference between Mr. MacDonald and Charles G. Dawes, United States Ambassador. Just previous to this conference, announcement had been made that the United States' answer to the latest British proposals had been received in London. It was announced that General Dawes carried this answer to No. 10 Downing Street, when he called on the Premier.

The two were closeted for an hour. The official date for Mr. MacDonald's sailing was announced immediately after the Ambassador had departed.

It was just such "conversations" as this which have marked the discussions since the Ambassador dashed from the steamer which carried him to England and had his initial meeting with Mr. MacDonald at Lissieuport on June 16. By the middle of August certain preliminary conclusions had been reached which were tentatively reported to Washington. The recent answer from the United States capital completed what many believed was the most important step for agreement.

Maintain Palestine Mandate

Great Britain Will Not Depart From Present Policy

London, Eng.—Lord Passfield, Secretary of State for the Colonies, informed a deputational committee representing the Jewish agency and the Zionists, that there could be "no question of the British Government's giving up the mandate for Palestine, or departing from the policy embodied in the Balfour Declaration of establishing in Palestine a national home for the Jewish people."

The Palestine-Arab executive in a note issued by its chairman denied rumors prevalent among Moslems in northern Palestine to the effect that Jews had damaged the mosque of Omar by bomb attacks. The police called upon all Arabs to keep the peace.

Forty-Two Bushels Per Acre

Saskatoon.—The best wheat yield reported from northeast and central Saskatchewan is that of Henry Wicket, Rosewater district farmer. On a 200-acre field of Marquis wheat he threshed 42 bushels per acre. It graded No. 1 hard. Mr. Wicket has 1,000 acres of wheat which is running from 35 to 40 bushels to the acre and is all grading No. 1. Up until this morning the Rosewater district has shipped 15 carloads of wheat which graded No. 1.

Largest Western Port

Vancouver.—According to figures obtained by Canadian Pacific Steamships Limited, the port of Vancouver now ranks first among the ports of the Pacific coast. Outstripping San Francisco and Los Angeles in volume of inward and outward traffic and tonnage of exports and imports with a total of 9,890,787 tons of food imported into and exported from Vancouver in 1928, it surpasses all competitors, the nearest in line being Seattle.

Fanatics B.C. Bards

Vancouver, B.C.—Chanting the wild Russian songs of their religion, 104 men and women with seven children, members of the Sons of Freedom sect of the Doukhobors, were quickly detained at Esquimalt, near New Westminster, and taken in buses to Okalla jail, where they began to serve sentences of six months for indecent exposure imposed at Nelson, B.C. The Doukhobors were arrested at South Sloane on August 25, after staging a nude parade.

Want Disarmament Conference

Geneva.—The League of Nations was called upon by the Irish Free State to convene a general disarmament conference in the near future. Patrick McMilligan, foreign minister of the Free State Government, made the proposal. He expressed regret that 11 years after the close of the great war so little had been done to remove the weapons of war.

Foreign Capital In Canada

United States Credited With Largest Share Of Investment

The Wall Street Journal's correspondent says: Regarding the possibility of financial readjustments through Canada in the event of Washington's tariff survey being such as to provoke reprisals, it is pointed out that of the foreign capital invested in Canada—\$874,294,000—United States sources are credited with \$550,000,000, and British capitalists with the balance.

Domestic capital, however, owns and controls 53 per cent. of all investments in the Dominion, and Canadians have invested in the United States approximately \$875,000,000. United States capital is invested chiefly in pulp and paper industries, railway securities and large timber interests. In the manufacture of pulp and paper, it is no secret that United States money and experts dominate the Canadian situation.

Western Canada, in addition, requires more capital. It is suggested that there are investments of a very profitable type in British Columbia alone, for another \$10,000,000,000. This cannot come from domestic sources. British investors do not seem in a hurry to compete with capital coming in from the United States for this purpose. The time is approaching when capital will have to be secured from some other source. It is a matter of banking record that very few investments by large American concerns on this side of the line have failed to prove profitable. This has not been the case so generally with British capital. The explanation is that almost invariably the American investors send their own men along to administer their projects. The British do this at "long range" and that has not proven so good.

Thus, no matter what the tariff may bring, feeling in Western Canada is that money knows no international restrictions. It is not felt that Western Canada thus will make any difference with these international investments. The pulp and paper investments from the other side located in Western Canada have proven enormously profitable and from them, products are being shipped to all parts of the world, but chiefly to the United States market.

Better Town Building

Alberta Towns Recently Swept By Fire Will Follow New Town-Planning Method

Better towns than have been built in the past are being planned in Alberta. In the first-named towns, action is now being taken for rebuilding on approved and systematized plans, in which the government town planning commission is assisting.

H. L. Seymour, provincial commissioner of town planning, has visited both Wainwright and Telford since the fires, consulted with the municipal officials, and suggested ways and means of improving and beautifying the towns in the course of their rebuilding.

A local town planning commission has been appointed in Wainwright, and a model building-by-law, prepared as a standard for use throughout the province, has been adopted.

The average distance of Venus from the sun is 67,000,000 miles. The planet receives no more than forty-eight degrees of heat from the solar disc.

Two young thugs were sent to jail the other day for taking \$7 out of a newspaper man's pockets. That's the sort of thing that put Houston on the stage.

Good punctation—vacation periods.

"Our beloved brother signed the pledge and kept it all his life until death released him."—Sondagsniese, Strix, Stockholm.

W. N. U. 1860

Had Interesting Career

Englishman Who Landed In Japan In The Year 1600, Is Japanese National Hero

The life of an Englishman who has been part of Japanese history for over 300 years, though he is almost unknown in his own country, is to be published this autumn.

In 1598, the tercenary of the death of Will Adams, the Japanese Government erected in Tokyo, a statue to this national hero, who died as Lord Hight Baron Pilot, of Japan.

Now his life is being prepared by Sam Lewis, a Fleet Street journalist, and it makes an amazing story. Adams was Drake's storekeeper, in charge of supplies when the Armada was destroyed. Being a man of a religious turn of mind, he objected to the piratical ways of the captain, and went into sea-going business on his own account.

He met sail for the Far East as master pilot of five ships. He landed on the shores of Japan in 1600, with one ship, in which there were left only five starving men who were able to stand.

When the survivors in their ship, Charity, came ashore, it was by good luck that they were not killed. For in those days every Protestant sailor who set foot in Japan was put to death.

Adams and his companions were brought before the great Tokugawa Shogun, who took a fancy to the Elizabethan captain, and asked him to build a ship for the Imperial Navy.

Using Old Postage Stamps

Very Serious Efforts To Make Use Of Cancelled Stamps

There are still scattered all over the world a few people who think that it is smart to cheat the Government of their country out of the price of a postage stamp. There are a few such in Canada, and once in a while, the Canadian postal authorities find that a letter has been mailed bearing a stamp that has not previously been cancelled.

Even an attempt to send a letter or package through the mails bearing a used postage stamp is a very serious offence, and the postal authorities warn the public that in such cases the person responsible for trying to use a postage stamp a second time will be dealt with according to the law. And the law imposes a fine of from ten to fifty dollars in each case. So it does not pay to try to save a couple of cents by this mean act of dishonesty. And, further, the letter or package is not returned to sender but is held for instructions from the Postmaster-General.

Growing More Tobacco

Canada Produced Over 4,500,000 Pounds During Past Three Years

"With more than 4,500,000 pounds of tobacco grown in Canada, during the past three years, it is time for us to think of our foreign markets," said Dr. N. T. Nelson, chief of the tobacco division of the Department of Agriculture, in an address at Ottawa, Canada was rapidly becoming a factor in supplying the world tobacco and every effort was being made to put her to the front as a tobacco growing country.

Of the smoking tobacco sold in Canada, about two thirds is home grown, while in the cigars sold in Canada, about 40 per cent. of the tobacco used is Canadian.

Insect Control In Canada

Forests Of Yellow Pine In British Columbia Saved By Control Work

The economy of insect control work is well illustrated in the case of bark beetles in yellow pine. These insects threatened the forests of yellow pine in British Columbia with complete destruction about six years ago. The Dominion and Provincial Departments of Agriculture co-operated in control work and destroyed more than 50,000 beetle-infested trees. The cost of these operations amounted to \$100,000, and the yellow pine stands which were saved from total destruction are worth \$6,000,000.

Modern Scenery

The bear went up the mountain, To see what he could see;

But 187 signboards, 17 auto camps, 56 filling stations, 76 orange juice stands, 11 garages, and 11,887 unshaven summer tourists Was all that he could see.

Banker: "Your father's name is forged on this note."

Son (indignantly): "It isn't! I wrote it myself."

Certain people become cowboys through environment, and others through conviction, but the young people of Canadian and United States cities are going in for that vacation as a happy, healthy, summer recreation. They go to the Dude Ranches in the Alberta foothills, and in increasing numbers each year. They ride the mountain trails, and they learn to rope and the calves; sleep out overnight; wear chaps and beaded duds; and in time they become thoroughly acquainted with the

Field Crops In The Peace River District

Good Yields Harvested In Spite Of Drought Conditions

An Illustration Station is operated under the direction of the Department of Agriculture, at Ottawa, in the far north point of Fort St. John, in the Peace River District. According to the report of the chief supervisor of Illustration Stations, very good yields were harvested in spite of a period of drought, and a measure of grasshoppers. In spring wheat, Reward and Garnet yielded identically 36 bushels to the acre, with Garnet maturing one day ahead of Reward, each giving excellent samples of grain. Turkey Red fall wheat yielded 26½ bushels to the acre, fall rye 38 bushels, oats of the Banner variety 20½ bushels, and of Legacy 22 bushels. Peas of the Chancellor variety gave 20½ bushels to the acre, while potatoes—Irish Cobbler—gave 307 bushels. Tests were made with different grasses and clovers sown singly and in mixture. The yields in pounds of cured hay amounted to 2,040 pounds for Western rye, 2,620 for broom grass, 2,710 for broom and Western rye grass, 2,080 for broom and sweet clover, 2,520 for Western rye and alfalfa, 2,900 for alfalfa, and 2,380 for sweet clover. Commenting on these crops in his report for last year published by the Department of Agriculture, at Ottawa, the superintendent states that both Western rye and broom were well adapted to local conditions and have given comparatively good yields in dry seasons.

Dr. L. L. Leivovitch, chief medical expert of the commissariat of public health, is in the city for the statement that murders and suicides have become fewer, but accidents and injuries resulting from violence are increasing, he said. Half a million persons, according to his figures, apply to doctors each year, in Russia, after being beaten or injured in accidents. The majority of them, he said, were "more or less intoxicated."

"This figure can easily be doubled to get at the true number of injured, inasmuch as fully half the people who are hurt do not go to doctors," explained the health officer.

"In rural districts, injuries are mostly due to beatings, family brawls and village rows, but in the larger cities 40 per cent. of the injuries are attributable to the dwelling crisis, which has caused so much overcrowding of many families into apartments meant for one family."

"Through all these statistics bases the red thread of alcoholism, which has been proven in Russia to be the inseparable companion of crime."

"Why Women Live Longer
"Women breathe much more frequently than men in the course of a minute," says Dr. Maurice Ernest, secretary of the Centenarian Club, in explaining why women live longer than men. For statistics show women centenarians are in the majority. "By this more active breathing they turn up more of the waste products in the body," he explains.

Crime In Russia

Taking Of Human Life Is Greater Than In Western Europe

Murder and suicide are both on the decrease in Soviet Russia, but the taking of human life is still greater than in Western Europe, and probably even greater than in America.

There are few statistics to go by, but the newspapers carry daily accounts of murders, in city and country, and often on a rather large scale. The number of village correspondents alone who have been killed in the last year or so runs into scores. They make it their business to report upon bribery, official malfeasance and other unpleasant conditions, and often they pay for their candor with their lives. Imprisonment for a few years is the usual punishment reserved for what the Reds consider more serious offenses.

counter-revolutionary activities, bribery, espionage and the like.

Dr. L. L. Leivovitch, chief medical expert of the commissariat of public health, is in the city for the statement that murders and suicides have become fewer, but accidents and injuries resulting from violence are increasing, he said. To Cultivate Soya Bean

Farmers In Great Britain Will Grow Vegetable With Many Uses

Scores of British farmers will next spring be sowing a bean that is literally worth its weight in gold. It is the wonder bean of the world, with more uses to its credit than any other legume or cereal.

For human food it provides fresh, condensed or dried milk, flour for bread or biscuits, margarine, cheese, a coffee substitute, infants' food, custard powders, salad oil, the basis of numerous sauces; while commercially it is used for soaps, paints, enamels, varnishes, printing inks, celluloid, rubber substitutes and glycerine for high explosives.

It has behind it a history of 5,000 years, but for reasons of climate has never in the past been successfully cultivated in England.

For more than fifteen years now, J. L. North, curator of the Royal Botanic Gardens, has experimented with seventy different varieties of Soya bean, seeking one that would be sown in May and harvested in September, and would thus be suitable for the British Isles.

At last his experiments have been crowned with success, and he declares that it will be henceforth definitely possible for farmers to secure supplies of seed.

Another experiment with couch grass was carried out to ascertain the effect of cultivation so carried out, as to cut up the plants into small pieces. The root stalks were separated into pieces of inch and half-inch lengths, and each piece containing a node or joint was placed in the soil under conditions suitable to growth. Eighty-eight per cent. of the inch pieces and fifty-two per cent. of the half-inch pieces produced healthy shoots.

Still another experiment by which the live couch grass root stalks were brought entirely to the surface, was carried out. It was shown that under dry and hot weather conditions ten days exposure was sufficient to dry out the root stalks to such an extent that they were incapable of further growth.

The report of E. S. Hopkins, the Dominion Field Husbandman, for 1928, gives the details of other experiments with couch grass, and recommends a practical plan for the eradication. This consists in ploughing the sod about five inches deep immediately after the hay crop is removed and keeping it worked thoroughly with cultivation at frequent intervals until the autumn, when deep ploughing should be done. This report, published by the Department of Agriculture, at Ottawa, covers a wide range of experiments in the handling of soil in farm practice.

Working to that end it is planned to seed 5,000 acres of beans next season. Backing up this "more beans" drive, "Profitable Farming," published by the L. N. colonization department, devotes practically all of its space to sugar beet publicity. A best excursion to the Leithridge Northern growing areas, was made in August, under the auspices of factory officials when many of the fine growing fields of beans on the project were inspected.

Turkey Bans Arabic Alphabet
So determined is the Turkish government to put over its pet reform of replacing the Arabic alphabet with the Latin, that it has ordered the postal and telegraphic departments to refuse letters or telegrams from Egypt, Syria, Arabia and other points that come addressed in the ancient characters.

An Irish landlord wrote to one of his tenants asking whether he would "quit or pay."

The tenant replied: "Dear sir, I remain, yours faithfully."

Eradication Of Couch Grass.

Some Practical Methods For Getting Rid Of This Troublesome Pest

It has been found by an expert, conducted by the Field Husbandry Division of the Imperial Farms, that couch grass plants will be greatly weakened if the plant is kept clipped back to the surface of the ground for a period of two months. This clipping back was mechanically done, and would correspond with close grazing. Clipping was continued up to the first week in October. The following spring the plants were so reduced in vitality as to produce only very weak shoots bearing no seeds by the month of September.

Another experiment with couch grass was carried out to ascertain the effect of cultivation so carried out, as to cut up the plants into small pieces. The root stalks were separated into pieces of inch and half-inch lengths, and each piece containing a node or joint was placed in the soil under conditions suitable to growth. Eighty-eight per cent. of the inch pieces and fifty-two per cent. of the half-inch pieces produced healthy shoots.

Still another experiment by which the live couch grass root stalks were brought entirely to the surface, was carried out. It was shown that under dry and hot weather conditions ten days exposure was sufficient to dry out the root stalks to such an extent that they were incapable of further growth.

The report of E. S. Hopkins, the Dominion Field Husbandman, for 1928, gives the details of other experiments with couch grass, and recommends a practical plan for the eradication. This consists in ploughing the sod about five inches deep immediately after the hay crop is removed and keeping it worked thoroughly with cultivation at frequent intervals until the autumn, when deep ploughing should be done. This report, published by the Department of Agriculture, at Ottawa, covers a wide range of experiments in the handling of soil in farm practice.

Working to that end it is planned to seed 5,000 acres of beans next season. Backing up this "more beans" drive, "Profitable Farming," published by the L. N. colonization department, devotes practically all of its space to sugar beet publicity. A best excursion to the Leithridge Northern growing areas, was made in August, under the auspices of factory officials when many of the fine growing fields of beans on the project were inspected.

Turkey Bans Arabic Alphabet
So determined is the Turkish government to put over its pet reform of replacing the Arabic alphabet with the Latin, that it has ordered the postal and telegraphic departments to refuse letters or telegrams from Egypt, Syria, Arabia and other points that come addressed in the ancient characters.

An Irish landlord wrote to one of his tenants asking whether he would "quit or pay."

The tenant replied: "Dear sir, I remain, yours faithfully."

Dude Ranching at Kananaskis

Building Up Dairy Herds

Illustration Stations Becoming Centres Of Live Stock Improvement

In the Eastern Provinces, Manitoba, and Alberta, the Illustration Stations operated by the Department of Agriculture, at Ottawa, are becoming centres of live stock improvement. At these stations fine dairy herds are being built up, and flocks and herds of very good sheep and hogs are being established. The majority of the station operators are now using pure-bred sires. They are keeping individual milk records and making butter fat determinations in order to learn the production of each cow. In his report for last year the chief supervisor of the Illustration Stations shows that the year's production of milk and butter fat differs greatly on the different station farms, while the average production of fat at the station herds varied from 408 to 121 pounds—a cow was found that yielded only 74 pounds of butterfat. These contrasts show the need and possibilities of systematic testing and selection. During the past year there were sold for breeding purposes by the operators of Illustration Stations, 260 head of cattle, 301 hogs, and 202 sheep.

Ernest Peace Palace
The League of Nations celebrated its tenth birthday recently by laying the corner stone of a magnificent "Palace of Peace," to rise on the shores of Lake Geneva. Leaders of more than two score nations halted their labors in assembly to attend the formal beginning of the buildings which will house the central headquarters of the far-reaching activities of the league.

The sixteen plants in the women's factory clothing industrial group in Manitoba, now produce over \$2,500,000 worth of goods annually, which is nearly double what it was five years ago.

Group of Canadian Scientists To Study Resources of Frontier Districts To Aid the Pioneer

Considerable interest has been aroused here of late and throughout the continent of Europe in the settlement of Western Canada, says the Monetary Times and continues: Government circulars, railway advertisements, and British newspapers interested in the "New West" devote much space to picturing Canada as a land of opportunity. Wealth is represented as awaiting the daring European emigrant on the very threshold of Canadian soil. He hears that, expansive prairies and great tillable plains await his plowshare and will insure him affluence and power. Disillusioned by these circular advertisements the believing immigrant has his hopes smashed by the outlook of frontier life. His new Canadian home is heaved out in an atmosphere that is full of disappointment.

The Canadian Government has brought many new settlers to Canada under the "assisted immigrant" plan. It is hoped that these families will settle on Canadian farms and will courageously dare the hardships of pioneer life. But in any case they are supposed to be agriculturists primarily.

A very distinct contribution toward improving the lot of the pioneer and gaining a more authentic knowledge of the location and resources of our frontier districts is being made by a group of Canadian and American scholars. The National American Research Council and Geographical Society have attempted a very comprehensive program. They hope to make a statistical and historical survey of the fringes of civilization, especially the pioneer belts. The plan is outlined by its farmers as follows: "A pioneer belt is a region of recent, progressive or potential settlement. In this study emphasis will be laid upon agricultural settlement, as well as the preceding forms of exploitation, lumbering and mining. The regions of primary interest are those possessing resources sufficient to support a socially tolerable and economically efficient population. The geographical focus is the temperate zone of either hemisphere and such sub-tropical areas as approach to a temperate zone climate."

The first region to be studied is that of Canada, supposedly because it is the most accessible. The study of this area aims to appraise its natural resources, to study methods of settlement with due regard to avoiding wastage of life and capital, and to trace the successive stages of utilization of natural resources and the resultant effects on economic and social institutions.

This phase of the project has been turned over entirely to an all-Canadian pioneer problems committee of which Dr. W. A. Mackintosh, professor of political and economic science, Queen's University, Kingston, has been named director. Other members will include: Dean W. J. Rutherford, University of Saskatchewan; Professor Chester A. MacArthur, Queen's University; Professor C. A. Dawson, McGill University; and Professor R. W. Munnell, Manitoba University.

The research conducted by these experts will fall into four categories: Physical conditions (climate, topography and soil); agricultural economics (farm management and unit sellers' program, and utilization of land and ranching); history and economics; and social structure. Their studies will cover the whole pioneer area of Canada, although concentrated on separate regions. The area is conveniently subdivided thus: (1) Quebec clay belt, (2) northern Ontario clay belt, (3) northern Manitoba, (4) southwestern Manitoba and southeastern Saskatchewan, (5) northeastern Saskatchewan.

"He said I was an idiot." "You can't blame him. He is just a parrot who repeats what he hears." —Pages Clark, Yverdon.

W. N. U. 1303

Rats Spreading Westward

Precautionary Measures Are Advised To Check Advance Of Vermin

A matter of fifteen years ago rats had become a major nuisance in the Red River Valley. They seemed to come from the south, and the United States, where the annual damage from rats is estimated at \$200,000,000, got the blame for the invasion. For some mysterious reason the rat menace vanished. There are still rats in the province, but the trouble they cause is relatively slight. Now it is Saskatchewan that is complaining. The rats are moving westward across the neighboring province. Four years or so ago rats were only found east of the line through Leboult, Broadview, Springfield and Freesville. At the end of 1936 they had reached Regina, Weyburn, Langman and Watson.

It is the rat that spreads the bubonic plague, and precautionary measures are being advised to check the spread of the vermin. Modern farm buildings on concrete foundations are ratproof, and by means of screening low-lying windows and chutes much can be done to keep them out. It is worth while taking such measures everywhere to prevent them getting a hold—Manitoba Free Press.

Alberta Crops

Forty Bushels To The Acre Reported In Peace River District

Those who have supposed that there were no good crops of grain in Central Alberta this year, will be interested to learn that a Wetaskiwin farmer, Mr. Gustave Elger, has been awarded the provincial championship for the finest field of wheat in the province. A day or so ago Premier Brownlee told us that there are crops in the Peace River district which are calculated to yield 40 bushels to the acre. Last week a report from the state stated that in the extreme southwestern corner of the province yields running up to the same figure were expected. The field crops competition in which Mr. Elger won was open to entries from any part of the province, and entries were actually made in districts all the way from the Athabasca River to the international boundary. To win under these conditions the prize field must have been good, not only by comparison, but by the standards which apply in a normal season.—Edmonton Bulletin.

Experience Was Limited

Man Could Not Give Opinion About Paying Rent

The woman who told the magistrate at Lambeth, England, she had moved 39 times in 35 years leads credibility to a story told by a well-known politician of a conversation overheard in that same district. A number of men were arguing whether it would prove cheaper to move or pay rent. At last, they appealed to an aged man who had taken no part in the controversy. "Well," said he, after due deliberation, "I ain't exactly in a position to say. You see, mates, I've always moved."

Etternal triangle—love, marriage and divorce.

Freight Rate Equalization

Petition Being Made For Adjustment Of Rates On Grain And Flour To Pacific Coast

The provinces of British Columbia, Alberta and Saskatchewan have prepared a petition to the Government in Council, appealing from the judgment of the Board of Railway Commissioners, of August 26, 1927.

It will be heard on October 15. Presented by Leon J. Ladner, K.C., for British Columbia, S. E. Woods, K.C., for Alberta, and W. H. McEwen, K.C., for Saskatchewan, the western provinces ask:

"That the mountain differential be entirely removed and that the prairie standard tariff of maximum mileage rates be applied to all territory west of Port Arthur.

"That the rates for the movement of grain and flour from prairie points to British Columbia for domestic consumption be reduced to the rates according to distance as now apply on grain and flour moving from prairie territory through Port William, Prince Albert to points in eastern Canada.

"That the rates for the movement of grain and flour to the Pacific coast ports for export over the lines of the Canadian Pacific Railway be based on actual mileage in accordance with the order of the Board of Railway Commissioners, dated September 2, 1925.

"That the special class lake terminal rates between Port Arthur, Port William, West Port and points in the province of Saskatchewan and Alberta be reconstructed so as to remove the present unjustly discriminatory and unduly preferential features thereof.

"That the rates on fruit from the producing areas of British Columbia to points on the prairies be established on an equality with the rates on similar fruits moving similar distances from the producing areas of Ontario to points in the prairie provinces."

New Type Of Horse In West

Saskatchewan To Evolve Heavy Hunter Saddle Horse

The evolution of a type of horse new to Saskatchewan, the heavy hunter and saddle type, with the ultimate object of providing an interesting and profitable side-line to farming, was launched in the Saskatchewan district, when a band of horsemen and women formed a Saskatchewan district branch of the Saskatchewan Hunter, Saddle and Light Horse Improvement Association with Col. H. W. Arnold as president, and M. W. Lawton as secretary. A membership campaign will be conducted. From Clifford Sifton, vice-president of the Dominion Association, the newly-formed organization secured a detailed and instructive account of the work done in Ontario where, in the space of a year 640 mares had been registered for breeding, when only 600 had been expected.

The Great Rift Valley is a gigantic crack in the earth, beginning in Palestine and running down to the south of Lake Nyasa, in East Africa, a distance of about 2,500 miles.

Promising Future Is Predicted For Port Churchill, Soon To Be Centre of Great Activity

Pigs and Ribs

It Appears That There Is a Variation In the Number Of Ribs In Different Breeds Of Hogs

"How many ribs has a pig?" It may have from 13 to 17 pairs, and occasionally an odd rib, according to Professor A. M. Shaw, head of the Animal Husbandry Department, of the University of Saskatchewan.

In an article contributed to the September number of "Scientific Agriculture," he gives the rib counts from an examination of 3,957 hog carcasses. Apparently the more ribs the better as the market demands a long side of bacon. At competitions the prizes almost invariably go to the hogs with the largest number of ribs. Professor Shaw has found, although the judges may not have actually counted the ribs. Few judges, he points out are aware that variation in number of ribs exists.

The Yorkshire hog has been found to have more ribs than "grinders" of other breeds. More work will be done at the University of Saskatchewan to find out whether or not additional ribs are of economic importance. The Department of Animal Husbandry will also attempt to develop pure strains with a uniform number of ribs.

Professor Shaw does not hazard any suggestions as to how the variation in number of ribs might be increased. The Garden of Eden the porcine Adam contributed a rib to each of several wives.

In view of all this, there seems no doubt that farmers should raise pigs with more ribs. As Dean Swift might have said: "The man who makes two pork chops grow where only one grew before, will do more for his country than any statesman who ever lived."

Self Feeders For Hogs

Found To Be Not So Satisfactory For Feeding Bacon Hogs

While self feeders for hogs save much labor they are not entirely satisfactory for the feeding of bacon hogs throughout the entire feeding period. This is particularly so in the case of newly weaned pigs, although a well balanced protein ration supplemented with milk by-products would appear to permit the use of the self feeder for the younger classes of bacon type hogs. In his report for 1928, published by the Department of Agriculture, at Ottawa, the Dominion Animal Husbandman states that some surprisingly good results have been obtained from using the self feeder throughout the entire feeding period. In too many cases, however, it is shown by experience at the Experimental Farms that the use of the self feeder has a tendency to result in a thicker type of hog that is usually produced by careful trough feeding.

Railway Accidents Reduced

Reduction Of Fifty Per Cent. Is Noted In Past Four Years

In the past four years the railways of Canada and the United States have decreased accidents by 50 per cent, according to figures brought out at the sessions of the American Railway Association safety section, Canadian branch, which have just closed at Montreal. Four years ago, the railways set themselves the goal of cutting accidents 35 per cent, by 1930.

In a year less, they have accomplished 30 per cent. "The railways," a speaker said, "are doing their part. The public is being educated too, but there are still too many people who insist on being negligent. "Under the public co-operation and learns the rule of 'safety first' we must still have accidents, no matter to what lengths we go to protect."

Glacier Park, British Columbia. Glacier National Park, British Columbia, derives its name from the magnificent, Illcillewaet Glacier, which is the chief centre of interest within its boundaries. This glacier falls from the Illcillewaet snowfield which is ten square miles in extent. From the crest of the snowfield the base of the glacier there is a drop of 3,000 feet.

Anxious Father (to friend): "I can't make out Tom's coat. He's a funny lad. I've taught him all I know and now he knows nothing." She—I wonder why they put corn meal on the dance floor. He—Oh, that's to make the chickens feed at home.

Colonel Dubois, chief engineer of the Department of Railways and Canals, and D. W. McLachlan, engineer in charge of the Hudson Bay Terminals, have returned to Ottawa from a tour of inspection of the railway and harbor works at the Bay. The engineers report excellent progress, although they say the port will not be ready for business for two or three years. Nevertheless Churchill is attracting residents, and already three of Canada's leading banks have established branches there. Furthermore, every time a report goes out of progress on the railway, there is a rush of barbers, bakers and other workers to the new port. There are 2,500 men at work on the railway line and 500 at the harbor, making a community of quite respectable size. The idea Churchill is a formidable centre for settlement is disappearing. Last winter, work was pursued on the railway, although the thermometer went down to 50 or more below zero at times. The men engaged were hardy pioneers, and on the railway they are building, the workers and small business men of the future town will ride in comfort to the new port. Cold in winter and extreme heat in summer do not deter settlement in Canada's north; witness the Yukon, far to the northwest of Churchill, where Dawson is a happy community, many of whose dwellers live in flower-covered houses and drive their motor cars over highways that were a quarter of a century ago foot trails to the gold-laden creeks of the Klondike.

Dominion of Canada maps show that gold is located in many sections south of Churchill, and iron and coal and other minerals. Big and small fur-bearing animals abound, the caribou being much in evidence; water powers are awaiting development and there are areas of pulpwood, all marked on the map. Polar bears may swim about among the icebergs right down to where the port works are in progress, and where blow and wallow at the front door, as it were, but there are other more promising signs not far inland. The lakes and rivers of the region teem with fish. In fact, Indians make a living with the Red Man's minimum effort. United States and Canadian experts declare that colder weather has been experienced in the centre of Manitoba and as far south as Montana than in Arctic Circle, which is much further north than Churchill. Stefansson insists that away up in the Arctic, where vast islands and many seas are in evidence, a man may exist comfortably—that the Arctic is friendly, in fact. However that may be, it is certain that Churchill is due to become one of Canada's northern communities, and that neither extremes of cold nor heat will keep adventurous spirits from going there in search of a livelihood. Settlement is moving towards the northern boundaries of the provinces whose territories stretch towards the Arctic regions, from Quebec to British Columbia—Montreal Gazette.

May Soon Need Certificate

The time is coming when the motorist who applies to renew his license will have to present a certificate from an approved garage to show that his car has been inspected and found in good shape. Until there is some such safe-guard there will not be a proper assurance that the highways are safe from an unnecessary source of danger.

Dear Old Lady (at village greeters): "Young man, I should like to try a pound of traffic jam—there's been so much about it in the papers lately."

"So you won first prize in the lottery? How did you come to choose No. 20?" "I chose the number corresponding to my age." "I must try that." "I wouldn't in your case—No. 33 never wins." —Karlakura, Oslo.

C.N.R. OFFICERS PROMOTED

Officers of the freight traffic department of the Canadian National Railways prominently concerned in the recent retirements and promotions are shown above. They are: (1) J. M. Horn, who has been promoted Assistant Freight Traffic Manager, Winnipeg; (2) J. M. Macrae, who has been appointed General Freight Agent, Vancouver; (3) W. Hatley, who becomes General Freight Agent, Winnipeg; (4) E. E. Rosevear, General Freight Agent, Winnipeg, on Dec. 15th, retired after 22 years of service, and (5) F. G. Adams, Assistant General Freight Agent, Winnipeg, whose duties are enlarged to give him supervision over rates and divisions.

DRAPED FLARE

A new silhouette for the youthful smart woman. It shows the raised waistline, a chic detail in all Paris frocks. The circular skirt is diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 566 combines printed and plain cotton voile, the popular summer fabric. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The deep slender hip-line, makes it suitable for the larger woman, by placing the circular fullness low. Chatterbox green chiffon, tomato red crepe de chine, yellow handkerchief linen, orchid and white printed lawn, purple aster georgette crepe, printed rajah in capucine tones, and sky-blue sheer lace are distinctly smart combinations for this charming afternoon model. Fastener price 25 cents in stamps or coin (coin is preferred). Wrap coat carefully.

The Most Beautiful BLACK you have ever seen

"THE most beautiful black you've ever seen!" "All my friends admire my new black silk!" The coat I thought was hopelessly spotted is now a new, beautiful black! These are typical comments from women who have used these true, jet black dyes.

Diamond Dyes Black never gives cloth a greenish or brownish look, as so many black dyes do. Like Diamond Dyes Red and all the other Diamond colors, it is easy to use and gives such beautiful results because it is rich in pure anilines. It is the anilines in dyes that give them brilliance, depth and fastness; make them go on smoothly and evenly, without

streaking or spotting. And Diamond Dyes contain the highest quality anilines that money can buy. The entire package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye of tan silk, wool, cotton, linen, rayon, or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

The Singing Fool

By HUBERT DAIL
Copyright, 1933, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Al insists on helping Molly, the ballad singer at Blackie's, because he loves her. Molly marries him, not loving him, and she pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly has a baby. After her return to the stage her romantic interest in John Perry, Al's best friend, is revived. Al becomes part owner and master of ceremonies at the fashionable Club Bombo. On the third anniversary of their marriage he slips a jewel case under a napkin on her reserved table. Molly is in her limousine with John Perry on the way to the club. He pleads with her to throw over Al for him and suddenly kisses her.

CHAPTER XIII.

Brimming over with affection, Al greeted Molly as she entered the Bombo Club. Then he turned to Perry and said wholeheartedly: "Awfully good of you, old man, to take care of Molly while I'm working."

Perry had turned away to see if any vestiges of Molly's faith still remained on his coat. Satisfied that he was safe, he turned his coat, hat and stick over to a check girl and acknowledged Al's thanks with an appearance of sincere cordiality.

"Yes, I don't mind," Al tucked his arm comfortably under Molly's and led her toward the orchestra platform. The crowd waited silently, giving her every attention. At the table which had left John Perry sat with his elbow on the table and his chin in his cupped hand, staring after her retreating figure. A vague smile played across his features. When the song was finished and Molly returned, Perry rose and said:

"That was splendid, Molly! I never heard you in better voice. You held them in the hollow of your hand."

"Thank you, John," said Molly quickly, but with pretended indifference. Then she turned to Al: "Can't you sit down and stay with us a while. Must you always be circulating among the customers?"

"I'll be back in a moment," whispered Al. "You know I want to, but with my every moment I can. But, after all, I'm master of ceremonies!"

Al was waiting for her to lift her napkin. When she leaned back in her chair and made no move to do it he pantomimed, definitely for her to look under the tiny square. Molly raised the napkin, saw the jewel case and card, and gave a cry of delight.

"Oh Al, this is wonderful of you!"

With eyes sparkling she tenderly

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid. Each bottle contains full directions—any druggist.

Molly shrugged her shoulders as he moved off. She had made her play for him to stay, but she was pleased he had gone off. Now she could talk to John.

"And you say you need him?" came Perry's whispered exclamation across the table.

"What do you mean?"

"Well, you heard the applause you got. You don't need him at all."

"Oh!" Molly smiled at the table-top without further words. The pink, polished nails of her white, be-ringed fingers went up and down with incredible rapidity. Too many rings on those slim fingers, too many glittering gems to be in the best taste!

How stridently they proclaimed her wealth and success! Molly glanced down at the brooch Al had just given her, as it reposed against the slim bodice of her gown. A few days before she had mentioned casually that she wanted a new brooch. Now—presto!—it was hers! But now, a few moments after Al had given it to her, it became just another costly ornament to add to her rich collection; the significance of the gift was lost on her.

A half hour passed, and Al returned to the table. Another half hour, and John Perry rose to go.

"I said so," John answered. "Now he was the one who thought of caution; he wished she wouldn't show her feelings so plainly before Al."

"Why?" she insisted. "I thought you'd run home with us for a vacation."

"Well, it's late for one thing. Besides, Molly, this is your anniversary. I know you and Al want some time alone together."

Perry spoke with the utmost gravity, but Molly thought she detected a sardonic gleam in his alert eyes. He was making fun of Al, and of her, too! For a moment she hated him for it. . . . But a moment later, when Perry had gone, she said Al for creating the situation. Her thoughts, which had been bewildered, turned bitter. Amvisary indeed!

The Rolls-Royce sped rapidly toward home, with Molly keeping silent the whole way. Al, believed she was tired, remained mum, too, out of deference to her mood. When they entered the reception hall of the apartment Molly curiously dismissed the maid and Al rushed off to the nursery, to see if Junior was sleeping.

The eyes of the young song-writer lit up with love for his baby son as he tiptoed across the nursery floor and surveyed the child, tucked safely away in bed. What a lovely picture Junior made, his mass of curls framing his delicate young face, his tiny body dozed nestled beside him on the pillow.

As Molly entered she was struck by Al's face told more plainly than words his complete love and utter devotion to Junior. For a moment she remembered her behaviour of the evening and a throbbing misgiving shot through her. She was unworthy and she couldn't hide it from herself. Only a great, unselfish love could give Al's face the expression of radiance it held now. She knew she could not achieve such a love and, suddenly, the realization brought a surge of furious anger within her!

Worms sap the strength and undermine the vitality of children. Strengthen them today with the new Graves' Worm Extirminator to drive out the parasites.

Migrating Birds

Long Flights By Birds Are Revealed By Leg Banding

Migrating birds have been demonstrated as flight variants by the United States Bureau of Biological Survey, which directs the work of 1,400 amateur ornithologists; the latter specialize in leg-banding. While the average feathered traveler maintains approximately uniform speed and range, now and then a Lindbergh of the species breaks records. In three months a leg-banded Arctic tern flew from Red Island, Labrador to Natal, South Africa, which, in a straight line, would be 10,000 miles. A robin winged from Crystal Bay, Minn., to Pasobuco, Mexico (2,100 miles), in eighteen months.

Fallacies About the Moon

When Not Visible Kaffirs Say It Has Headache

The Dakota Indians think that the moon at its waning is eaten by mice. The Polynesians believe it is devoured by the spirits of the dead. The Kaffirs say that it wanes when, suffering from a headache, it puts its hand to its forehead and hides the latter from our view. The Eskimos imagine that the moon, harassed by fatigue, retires for a moment to take a rest and food.

Travelling Libraries

1,200 Travelling Libraries in Circulation at Saskatchewan

Many applications are received by the Saskatchewan Bureau of Publications for travelling libraries, which are supplied to rural districts. The library consists of a stout wooden box about 10 inches deep and two feet square, which holds from 40 to 500 books. When the necessary application form has been filled in and forwarded to the department, usually by some responsible citizen on behalf of a community organization, a library is sent by express charges paid. When all the books have been read by the residents of the district the library is returned. The Government pays the charges one way, and the readers pay the return charges. At the present time there are 92,500 books available and 1,250 travelling libraries are in circulation.

A WARNING TO MOTHERS

Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at \$6. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fortune-Teller: You will suffer poverty until you are thirty-five years old.

"And then?"

"By then you will have got used to it."

Dibble: "Did your firm fail to pay its debts?"

Biggs: "No; it failed so that it wouldn't have to pay them."

International Amputation Club

Organization To Unite Under One Banner Proposed In St. Paul

Thousands of Canadian and United States soldiers who lost arms or legs on the battle fields of France, began through representatives at the veterans of foreign wars annual convention in St. Paul, movements toward formation of an international "Amputation Club."

Robert Burns, of Winnipeg, who lost his right arm in the world war, and who is the head of a Canadian "amputee" club of more than 1,000 members, declared that such an organization "might prevent the world from forgetting us."

"We want every Canadian, American, English, French and other allied soldier who lost an arm, leg or eye 'over there' to unite under one banner," Burns said, "and join in the fight now, so we won't be forgotten."

Little Helps For This Week

"In Thy presence is fulness of joy," Psalm xvi. 11.

"Friend of souls" 't is well with me
Whenever Thy love my spirit calms;

From sorrow's dungeon forth I flee,
And hide me in Thy sheltering arms.

The thought of weeping flies away
Before the heart-reviving ray
Of love that beams from out Thy breast;

Here is my heaven on earth begun;
Who were not joyful had he won
In Thee, O God! his joy and rest.

—Wolfgang Dersler.

We can even here be with God, so long as we bear God within us. We should be able to see without sadness our most joyful friends fade away like sun-flowers, because the sun above us still forever beams, eternally makes new and cares for all. And we must not so much prepare for eternity as plant eternity in our hearts—eternity serene and pure, full of depth, full of light and all else.—Jean Paul Richter.

Anglo-American Comity

Close Co-operation Of Britain With America Is Desired

The hesitancy of Prime Minister MacDonald to turn too suddenly from a European outlook to one involving the closest co-operation with America is understandable. But his well-known conviction that British foreign policy should be based firmly upon Anglo-American comity promises an ultimate and definite trend in this direction. If the British Empire and the United States are to become the arbiters of world peace, they must put themselves in a position to dictate the basis of that peace.—Philadelphia Ledger.

Education For Labor

Inauguration Of Workers' Educational Classes Is Advocated In Manitoba

Inauguration of workers educational classes on lines similar to those which he said were flourishing in Great Britain, Australia, New Zealand and South Africa, was urged by R. J. Hall, of Swansea, Wales, at a conference with prominent Manitoba educationalists, Labor leaders, and government officials held at Winnipeg. Hall is a promoter of the scheme in the old country.

Hon. R. A. Healy, provincial minister of education, thought it possible his government might be interested.

Proposed Nicaraguan Canal

The route of the proposed Nicaraguan Canal, stretching 163 miles through tropical mountains and forests from the Atlantic to the Pacific ocean, will depend on reports from a battalion of 400 engineers who were recently ordered to duty in the central American jungle to survey the route of the \$1,000,000,000 canal.

Stop Colds With Mimir's Liniment

Use Of Radium

Complete Potency Of Radium As A Cure For Cancer Not Substantiated

Warnings against undue optimism were sounded at the sixth annual meeting of the British Empire Cancer Campaign, presided over by the Duke of York. Sir Thomas Horder, physician in ordinary to the Prince of Wales, and physician to St. Bartholomew's Hospital, in presenting the annual report, said that the launching of the National Radium Fund might create in the minds of many people an unfounded belief in the complete potency of radium as a cure for cancer. Such a belief might have very unfortunate results for the patient if carried into practice in any case in which the growth was completely removable by operation. In the course of time radium might come to equal or even exceed operative measures in efficiency.

At present, however, it was the bounden duty of the doctor, in every many cases, in his patient's interest, to overrule his antipathy to surgical measures. All the same, the number of cases to which radium was applicable and the number in which brilliant results were achieved increased every year. But Sir Thomas added that it was open to considerable doubt whether many of the institutions that were advertising for money to purchase radium had in their staffs men or women qualified to use it. It might even be necessary to employ some of the money collected in providing for such training in the use of a powerful but dangerous remedy.—Toronto Mail and Empire.

A Mixed Population

Brooklyn, N.Y., with a population of more than 2,300,000 has residents from every country of Europe and South America, as well as from most parts of the other continents.

Hard and soft combs both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

There's just three things that I have never seen, an undertaker's funeral, a colored woman driving a car, and a parrot that could really talk.

An essayist has discovered that two can live on three hundred pounds a year; but he omits to say two what.

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not so well as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."

—Evelyn Bonaparte, 134 Alameda Street, Montreal, New Brunswick.

Mr. D. P. Hays of Carstairs was
a visitor in town on Thursday and
Friday.

Mrs. W. A. Waldoch, entertained
at the tea hour on Friday after-
noon.

Born—to Mr. and Mrs. W. K.
Gibson, on Thursday, Sept. 12, a
daughter.

Mrs. P. C. McCrea of Bassano
with her small children is at
present the guest of her parents,
Mr. and Mrs. Halliday.

Mrs. Robt Whitfield, who has
been visiting in England for the
past few months returned to Cross-
field on Wednesday.

One of Anna Q. Nilsson's most
recent successes is "Blockade" a
daring picture of war in the air and
on the sea, here next week.

Miss Helen Shantz of, Calgary
and Mr. E. Ford of Didsbury, were
visitors at the home of Mr. and
Mrs. Harry Fitzpatrick on Sunday

Mr. and Mrs. H. Michem and
Catherine Lant motored to Calgary
on Saturday to hear Sir Harry
Lauder. They report a very good
programme.

Miss Noble Young entertained
a number of friends at Tea on
Wednesday afternoon at the home
of her grandmother, Mrs. W. Mc-
Rory.

Mr. and Mrs. Roy Barr of Car-
bon, were in town this week to be
present at the funeral of Mr. Robt.
Whitfield, whose death occurred
on Monday.

A dance will be held in the new
Community hall at Balzac in aid
of the Airdrie Hockey Rink As-
sociation, on Wednesday, Oct. 2,
commencing at 8.30. The Rythm
Kings will furnish the music.

The Chronicle office has just
completed a twelve thousand lot
of Letterheads and Statements
for the firm of Halliday & Co.,
our local progressive general mer-
chants. If you require anything
in the stationery line the Chroni-
cle office can supply your needs
at reasonable rates.

Miss Lala Casey, young daughter
of Mr. and Mrs. M. L. Casey was
rushed to the hospital in Calgary
on Friday night after an acute
attack of appendicitis. An operation
was performed on Saturday but
the child was left in a dangerously
critical condition. All of her friends
join us in hoping for a satisfactory
recovery.

An Annual field day is to be held
at Didsbury on October 4th, schools
from along the line from Crossfield
to Inisfail are supposed to be
taking part. There are to be
thirty eight track and field events to
be run off. We wonder if anyone
knows anything about it or is it an-
other case of lack of organization?
It's a splendid idea to promote sport
in the school but let there be a live
body behind it.

Mrs. McRory was hostess to the
bridge club on Tuesday night.

Mr. J. J. Anderson is back in
the district supervising certain
threshing operations.

Mr. C. Mieland made a trip north
to Lacombe on Sunday, returnin g
the same day.

Mr. and Mrs. Bert. Mobbs and
Frances visited Calgary on Friday
night to hear Sir Harry Lauder at
the Grand Theatre.

Sunday, Sept. 29, is RALLY
SUNDAY, and an important day
for the children and parents of the
United Church and Sunday School.

We notice various enthusiasts have
already ventured into the field
since the opening of the shooting
season this week.

Mr. and Mrs. A. Stevens spent
last week-end visiting at the
ranch home of Mr. and Mrs. A.
Robertson, On Monday morning
they availed themselves of the
opening of the duck shooting
season and spent several pleasant
hours hunting.

THE FORD CAR REAR AXLE

Expense no object in Achieving Perfection

THE rear axle of the Ford car is of the three-quarter
floating type with spiral bevel gear. The pinion
hub is exceptionally heavy, and, as the pinion is carried
on double taper roller bearings, perfect alignment of
the gear is always assured. The rear axle has a total
of four roller bearings which add considerably to the cost
of manufacture but are a protection for the owner
against wear.

Special care is taken to insure silence in the pinion and
ring gears. These are made up in sets and carefully
matched, each set being run in to eliminate all possi-
bility of noise in operation.

The differential side gears are forged integral on the
rear axle shafts and the teeth then cut. This permits
of lighter and more simple construction. The shafts are
unusually strong, and, as the centre line of the wheel
comes over the bearings, there is no overhang of the
axle shaft, and it has no weight to support.

The use of malleable castings is eliminated in this new
axle housing which is made entirely of steel. Bell
forgings welded to steel tubing make up the shaft
housing which is bolted to an all steel differential
housing. The care and skill devoted to the manufacture
and assembly of rear axle parts is typical of the high
standards of Ford engineering.

Drive it
Yourself—
there is no
Better Test

Ford Car Features

Choice of colours
25 to 35 miles an hour
40-horse power engines
Full balloon tires
Fully enclosed steering wheel
1 Houdaille hydraulic shock absorbers
20 to 30 miles per gallon of gasoline
Shatterproof glass windshield
Thirt's proof ignition lock
Reliability and low upkeep
